Intro

Purpose

Scope

Examples

Purpose

Practice and consolidate

HTML, CSS and JS

Learn by failing

Personal insights

Technical insights

Scope

Requirements:

Simple game

Best practices

Single page (Single html)

3 states (splash, game, gameover)

Able to restart

Required Technologies:

Basic HTML + CSS

JavaScript (Canvas, DOM, Basic JS, Classes)

Version control tool (Git/Github)

Bonus: Local Storage, Audio, Mobile version...

States (with DOM)

Kraken Brigade

Instructions!

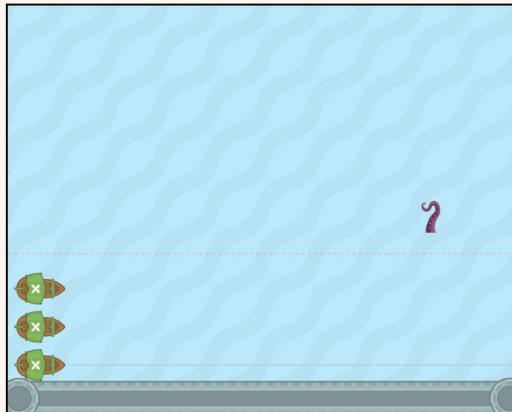

Shoot the tentacles and avoid getting them stacked after the dotted line

Arrow Left → Move Ship Left
Arrow Right → Move Ship Right
Arrow Up → Shoot Those Darn Tentacles!
Arrow Down → Anchor the Ship!
Q → Toggle Between Ships
P → PIRATE POWAH! *use it wisely*

Name:

START!

Kill Score: 0 Difficulty: *ahoy* Time Score: 6

YARR!!

your score is... 44

High Score:

- filthy landlubber : 44
- filthy landlubber : 0
- filthy landlubber : 0
- filthy landlubber : 0
- filthy landlubber : 0

Name:

RESTART!

IRON
HACK

Project Examples

Space Doggo - <https://jaime-laureano.github.io/SpaceDoggo/>

Mission to Mars - <https://danicalvente.github.io/Mission-to-Mars/>

Rippin Brah!!! - <https://1travelintexan.github.io/Rippin-Brah-/>

Beers & Monsters - https://luizfelipedossantos.github.io/Beers_and_Monsters/

Heroes Sky Fight - <https://halokaya67.github.io/heroes-sky-fight/>

Blossom Chase - <https://jnmelio.github.io/Blossom-Chase/>

Next steps

next 1 or 2 days

Idea

Validation

Sketches

Define MVP

Create Readme

Trello board

Sign-off

Idea

Dig around the internet

Or your childhood

Or the 80s... some examples:

<http://www.free80sarcade.com/index.php>

https://www.retrogames.cz/play_267-Atari2600.php

Simplify the idea to something you think you can build in 2 days

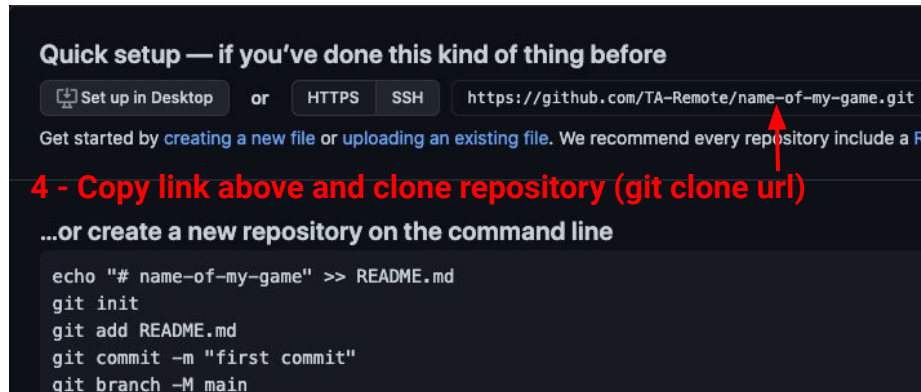

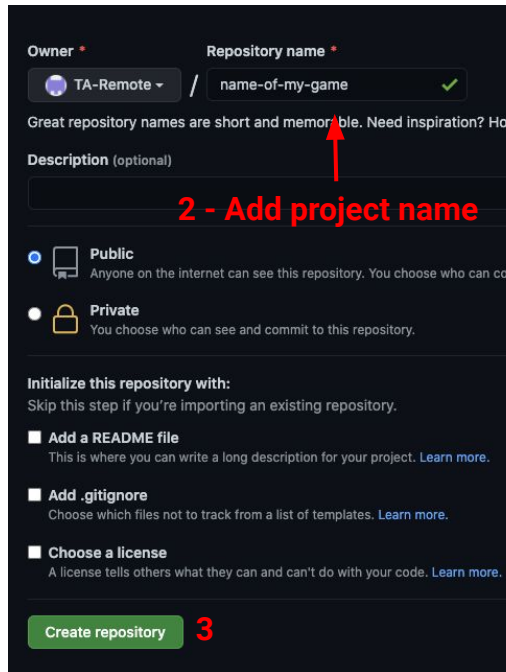

Validation

Run the idea(s) through your Team Lead so they can green light it

- What are the basic functionalities (MVP vs. backlog) ?
- What is the winning/losing logic ?
- How will the screens look like ?
- What is the name of your game ?

Creating a repository

5

```
git add .
git commit -m "Initial commit"
git push origin main
```

Planning & documentation

Sketches/Wireframes

Draw the app states

Know where the buttons are

Draw the flow between states

Data Structures

Readme.md

Canvas & DOM

Organize files & classes

Describe the files & classes

Task List

Break down your tasks

Small tasks

Order them by priority

Readme.md

Always fill Readme.md from VScode (not from Github)

Documentation is key for success

Use the template we provide

Keep track of your planning

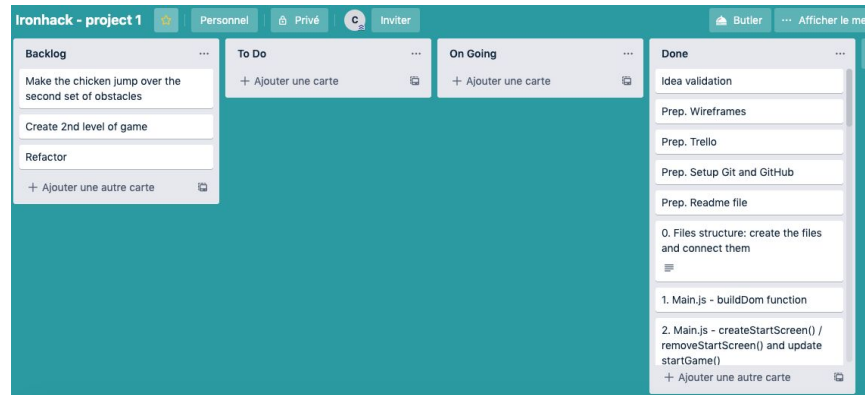

Update plan if it changes

[Link Template](#)

Planning Session

“Plagiarism is bad, please don’t do it”

-a very serious person

Support

Resources + Research

Move freely between breakout rooms. Help each other!

Slack # 01-ask-the-class

Instructional Staff ** **Through the slack channels, no DMs and no Zoom help btn!** **

Deployment

Web Devs > Localhost Devs

First deploy ([docs](#)) Wednesday

Deploy early

Deploy often

Test online

Milestones

Student

Code freeze
